

## Clearview 6200 Series

The 6200 series is manufactured of high quality extruded PVC material, providing an energy efficient patio door which is available to meet ENERGY STAR® Qualification. Simply add the Cardinal (4th surface) LowE i89 to our standard Dual glazed E180 ESC IG unit, or the optional Triple Glazed, Double LowE E180 ESC, IG unit to meet Energy Star® requirements. The 5-7/8" frame allows for ease of installation and caulking application when replacing older sliding doors. The newly designed sill threshold is supplied with a stainless steel panel track, and a unique drainage system which will provide years of easy gliding and performance.

\*Doors with enclosed blinds do not qualify for Energy Star.

## Standard Features

- Extruded PVC vinyl frame best resists transfer of heat and cold, will not warp, split, or rot.
- The vertical stiles are reinforced with aluminum or galvanized steel for added strength.
- Two tandem Acetal Precision Rollers will provide years of quiet and smooth operation.
- Aluminum frame screen with fiberglass mesh, lock and adjustable acetal rollers.
- Standard powder coated durable handles, with mortise style locking system. Available with multipoint locking.
- Unique chambered sloped sill to ease water run off, with stainless steel panel track and anodized screen track (6'8 & 6'10).
- Standard height knock down doors are fully reversible, can be assembled to slide left or right.
- Glass is fully tempered and sealed units standard with Low Emissivity Coated ESC180 glass, Warm Edge Spacer, and Argon Gas.
